

TS52

Technical Features

- › Pressure switch with two adjustable pressure switch points
- › Simple switch point setting by means of two setting rings allowing optimum reading
- › High long-term stability thanks to robust stainless-steel measuring cell with high permissible pressure rating
- › Mechanical locking prevents inadvertent switch point manipulation
- › High vibration and shock resistance
- › Service-life more than 50 million pressure cycles
- › For use in hydraulics, pneumatics, air-conditioning and refrigeration
- › UL approval and certification acc. to PED direction

Functional Description

Pressure switch with a stainless-steel measuring cell and two adjustable pressure switch points. Two adjusting rings are provided with scale and their position is protected with a mechanical lock. adjusted pressure value. The stainless-steel body is provided with connecting thread G 1/4 with FKM sealing ring. An electric connection is realized by four-pin connector M12 x 1. The pressure switch is suitable for industrial usage thanks to robust design, vibration and shock resistance. Outputs: two switching contacts (pin 2 and pin 4)
